《Reason for Special Dividends》

Since the fiscal year ended March 31, 2014, we have strengthened our policy of returning profits to shareholders by raising our pledged dividend payout ratio from 30% or more of consolidated net income to 50% or more of consolidated net income. In addition, for the six years from the fiscal year ended March 31, 2015 to the fiscal year ending March 31, 2020, we have been striving to return profits to shareholders by paying special dividends every year.

In addition, as part of our efforts to further strengthen our shareholder return policy, we have decided to pay the above special dividend in addition to the ordinary dividend, starting with the interim dividend for the fiscal year ending March 31, 2024.

The special dividend will be paid out due to the following reasons: (1) The Company's earnings base has become more stable than before as a result of steering the Company toward asset management-type sales; (2) The Company's businesses related to online trading department (including businesses related to the Marusan trade and call centers) were transferred in July 2022. The need to have a large amount of cash on hand has diminished due to a decrease in the balance of loans related to stock margin transactions. (3) From the viewpoint of optimizing the level of internal reserves based on these factors and others, the Company intends to return the internal reserves entrusted to it by shareholders in order to improve capital efficiency. At the same time, we will further improve our earnings structure and further promote capital efficiency.
